

Topics of Theory of Neurosciences: Behavior and Emotions

By Giocondo Bocciarelli

Lulu.com, United Kingdom, 2008. Paperback. Book Condition: New. 229 x 152 mm. Language: Italian . Brand New Book ***** Print on Demand *****.This is essentially an essay of theory of neurosciences. It is not of psychology, that is an applied science, according to me. It is not a popular manual of how to manage our emotions. Despite the aspect, it is not a philosophical paper, but it is obvious the great interest of these disciplines on it. But also of A.I., sociology, theology, and so on. The models are described by a synthetic and unorthodox way. Some passages are very difficult to understand without a solid background (and an open mind too.).
