Millington House Publishing. Paperback. Condition: New. 364 pages. Dimensions: 9.0in. x 6.0in. x 0.8in. Anyone who is searching for a complete understanding of our reality should read this book and study the theory. It is the only comprehensive explanation to date that integrates all facets of our existence into one grand unified worldview. It explains how consciousness and intelligence, not only interact with matter - energy and space - time, but are also an integral and inseparable part. It is the only theory presented so far that accounts for all aspects of our physical and mental reality which until recently have been viewed as separate entities. The most basic premise of the theory postulates that there was one homogeneous virtually infinitely energetic substance at the origin of the universe with the initial emergent properties of Matter-energy, Space-Time and Intelligence-Consciousness which might be referred to by the acronym MYSTIC giving the same comic relief as the term Big Bang for the origin of the universe. These six properties were totally and completely integrated and interdependent. Consciousness - intelligence began directing this basic substance from its simplistic origin to the extraordinarily complex state that the universe currently exists. It began approximately 13.7 billion years ago from a state of near infinite contraction and has been in a state of continual expansion and evolution ever since. The theory combines our current understanding of quantum mechanics, general relativity along with consideration of super string theory, the evolution of animal and plant life from simple to complex forms and how this relates to consciousness culminating in ordinary states of human consciousness as well as the currently recognized supraconsciousness states. The presence of the latter allows for any and all psychic phenomenon that many people have described. This could act as a firm basis for any...
