Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from **A Design of a Modern Foundry: Thesis for the Degree of Bachelor of Science in Mechanical Engineering in the College of Engineering of the University of Illinois, Presented June, 1909** In the design of this foundry I have considered jobbing work in small grey iron castings, as the kind of product to be turned out, and have used that as a basis from which to work. Now in all foundries where the output depends upon the market, as in the case under consideration, some account must be taken of the fact that the kind of work to be done may vary within reasonable limits, and the construction, therefore, should be made to take care of such variation. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
