Reviews

This publication is definitely not simple to begin on studying but really exciting to read. It is actually rally fascinating through reading time. Your life span will be enhance when you complete looking at this publication.
(Laurence Littell)

MINERÍA DE DATOS MODELOS Y ALGORITMOS

UOC EDITORIAL, 2017. Condition: Nuevo. En este libro se introducen los conceptos fundamentales de la minería de datos (data mining) y del aprendizaje automático (machine learning). El lector podrá encontrar una revisión completa de las técnicas avanzadas más usadas en estos campos con un enfoque claramente descriptivo para que entienda los conceptos e ideas básicas ocultos detrás de cada algoritmo o técnica. Las páginas de este libro abordan desde las etapas previas de preparación de los datos -los métodos de reducción de la dimensionalidad y extracción de características (PCA, SVD, NMF), métodos de aprendizaje no supervisado (agrupamiento jerárquico, k-means, canopy), métodos de aprendizaje supervisado (k-NN, SVM, redes neuronales, árboles de decisión, métodos probabilísticos)-, hasta los diferentes métodos de combinación de clasificadores.
