

Resource Allocation in Unlicensed Long Term Evolution HetNets

Filesize: 3.24 MB

Reviews

The publication is not difficult in go through better to comprehend. I could comprehended everything using this created e publication. Its been designed in an exceptionally easy way in fact it is merely soon after i finished reading through this ebook by which basically transformed me, modify the way i really believe.

RESOURCE ALLOCATION IN UNLICENSED LONG TERM EVOLUTION HETNETS

To read **Resource Allocation in Unlicensed Long Term Evolution HetNets** PDF, remember to click the button beneath and download the document or gain access to other information which are have conjunction with RESOURCE ALLOCATION IN UNLICENSED LONG TERM EVOLUTION HETNETS ebook.

Springer-Verlag Gmbh Jan 2018, 2018. Buch. Condition: Neu. Neuware - This SpringerBrief investigates cross layer resource allocation in unlicensed LTE (Long Term Evolution) HetNets. Specifically, the authors study and cover the radio access management of unlicensed LTE to allow efficient spectrum utilization and harmonious coexistence with other unlicensed systems in this brief. Efficient radio access protocols are developed to allow unlicensed LTE users to fair share channel access with unlicensed users in different systems, including Wi-Fi and unlicensed LTE of other operators. An analytical model is developed to study the performance of the proposed protocols. To achieve efficient spectrum sharing among various unlicensed users, the authors further formulate a resource allocation problem based on Nobel Prize winning game theory framework, and propose efficient algorithms to achieve the maximal user utility. Opportunistic traffic offloading from licensed band to unlicensed bands is also investigated, based on the network formation game. By exploiting the characteristics of mobile social networks, the offloading performance can be further enhanced. This brief targets researchers and engineers from both academia and industry interested in the development of LTE over unlicensed bands, as well as the design and implementation of cross layer radio resource management. Students studying electrical engineering and computer science will also find this brief useful for their studies. 115 pp. Englisch.
