

Bee Alarm! (Paperback)

By Diana Freeman

Flying Start Books Ltd, New Zealand, 2014. Paperback. Condition: New. Philip Webb (illustrator). Language: English . Brand New Book. Bees are important insects because they make honey. They also pollinate flowers and keep our environment beautiful. They are needed for fruit pollination. Beekeepers look after bees and make sure their hives are near flowers which will give them the nectar to make honey. When bees swarm, they are following their queen from an old hive to make a new colony somewhere. Bee Alarm! is about a swarm of bees who settled in a schoolyard and had to be removed safely. Reading Level 24/FP Level N.

Reviews

This publication may be really worth a go through, and a lot better than other. It really is written in simple terms and never difficult to understand. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Natalie Abbott**

This book will not be simple to get going on reading but extremely exciting to read through. Yes, it can be play, still an interesting and amazing literature. I am very easily could possibly get a delight of reading a written book.
