AUTOMATIC VEHICLE LOCATION

Alphascript Publishing. Taschenbuch. Condition: Neu. Neuware - Automatic vehicle location (AVL or ~locating; telelocating in EU) is a means for automatically determining the geographic location of a vehicle and transmitting the information to a requester. Most commonly, the location is determined using GPS, and the transmission mechanism is a satellite, terrestrial radio or cellular connection from the vehicle to a radio receiver, satellite or nearby cell tower. Other options for determining actual location, for example in environments where GPS illumination...

Reviews

An incredibly great ebook with lucid and perfect reasons. It is really basic but excitement within the fifty percent of your book. Its been designed in an extremely simple way and is particularly simply after i finished reading this book by which actually changed me, affect the way in my opinion.

-- Dr. Fiona Grimes PhD

Very useful to all of group of people. I actually have read through and so i am certain that i will planning to study yet again once again down the road. I am just very easily can get a satisfaction of looking at a created book.

-- Mark Bernier
