To advance our knowledge of occupational fall injuries, the International Conference on Fall Prevention and Protection (ICFPP), held in May of 2010, was convened to provide a forum for researchers from NIOSH, its stakeholders, and the community of fall-prevention specialists and experts to present research findings, recommendations and expert advice on the latest tools and methods to reduce the incidence of injury from falls. At the conference, a wide variety of research approaches and methods were presented, and these approaches reflected the multidisciplinary orientation of the different stakeholders in attendance, as well as the individual interests and expertise of participating researchers. NIOSH is pleased to present the findings from this conference in these proceedings. This document represents a wealth of knowledge from experts and informed stakeholders on the best way to understand, prevent, and control fall-related risk exposures. This item ships from La Vergne, TN. Paperback.
