MEMORY

To save **Memory** PDF, please refer to the button under and save the document or have accessibility to additional information which are related to MEMORY book.

Psychology Press, 2014. Book Condition: New. Brand New, Unread Copy in Perfect Condition. A+ Customer Service! Summary: "This second edition of Memory is, if anything, even better than the first. It is an outstanding coverage of current findings and theories written by top international authors. This edition has more on the brain correlates of memory, and more on lifespan development and memory disorders. It is written in an engaging personal style and may be strongly recommended both as a textbook and as an authoritative up-to-date source for the general reader." -- Fergus Craik, Rotman Research Institute, Canada "The second edition of this excellent text builds on the strengths of the first edition: accessible writing by a team of leading memory researchers that covers both classic studies and new developments. The text seamlessly integrates research from cognitive psychology, neuropsychology, and neuroimaging. I highly recommend this informative and enjoyable text." -- Daniel L. Schacter, Harvard University, USA "The past decade has seen breathtaking leaps in our scientific understanding of human memory, in terms of both behavior and the brain. This text reflects a seamless coordination of effort from three leading memory researchers with complementary interests in different aspects of memory. They manage to present what is known in a thorough, organized, and engaging manner while still conveying the sense of adventure and open-mindedness one needs to appreciate important, unanswered questions about memory that are fundamental to our understanding of what it is to be human." -- Nelson Cowan, University of Missouri-Columbia, USA "I very much liked the first edition of this text. The second edition is even better. The authors have added material, rearranged the chapters so that they flow better, and the result is a wide-ranging textbook that excels in its coverage of the field. Bravo!" -- Henry L. Roediger,...
